NOTIFICATION OF TRANSMITTAL OF
THE INTERNATIONAL SEARCH REPORT AND
THE WRITTEN OPINION OF THE INTERNATIONAL
SEARCHING AUTHORITY, OR THE DECLARATION

(PCT Rule 44.1)

Applicant's or agent's file reference CP1001-WO	Date of mailing (day/month/year) 10 APR 2006
International application No. PCT/US05/16449	International filing date (day/month/year) 11 May 2005 (11.05.2005)
Applicant SBC KNOWLEDGE VENTURE, L.P.	

1. ☒ The applicant is hereby notified that the international search report and the written opinion of the International Searching Authority have been established and are transmitted herewith.

Filing of amendments and statement under Article 19:

The applicant is entitled, if he so wishes, to amend the claims of the international application (see Rule 46):

When? The time limit for filing such amendments is normally two months from the date of transmittal of the international search report.

Where? Directly to the International Bureau of WIPO, 34 chemin des Colombettes
1211 Geneva 20, Switzerland, Facsimile No.: (41-22) 338.82.70.

For more detailed instructions, see the notes on the accompanying sheet.

2. ☐ The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the International Searching Authority are transmitted herewith.

3. ☐ With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:

- ☐ the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.
- ☐ no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

4. Reminders

Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.

The applicant may submit comments on an informal basis on the written opinion of the International Searching Authority to the International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination report has been or is to be established. These comments would also be made available to the public but not before the expiration of 30 months from the priority date.

Within 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed acts for entry into the national phase before those designated Offices.

In respect of other designated Offices, the time limit of 30 months (or later) will apply even if no demand is filed within 19 months.

See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the *PCT Applicant's Guide*, Volume II, National Chapters and the WIPO Internet site.

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference CP1001-WO	FOR FURTHER ACTION <div style="float: right; font-size: small;">see Form PCT/ISA/220 as well as, where applicable, item 5 below.</div>	
International application No. PCT/US05/16449	International filing date (<i>day/month/year</i>) 11 May 2005 (11.05.2005)	(Earliest) Priority Date (<i>day/month/year</i>) 02 July 2004 (02.07.2004)
Applicant SBC KNOWLEDGE VENTURE, L.P.		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the Report

a. With regard to the language, the international search was carried out on the basis of:

the international application in the language in which it was filed.

a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b))

b. ☐

With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. I.

2. ☐ Certain claims were found unsearchable (See Box No. II)

3. ☐ Unity of invention is lacking (See Box No. III)

4. With regard to the title,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the abstract,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. With regard to the drawings,

a. the figure of the drawings to be published with the abstract is Figure No. 1

as suggested by the applicant.

as selected by this Authority, because the applicant failed to suggest a figure.

as selected by this Authority, because this figure better characterizes the invention.

b. ☐

none of the figures is to be published with the abstract.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US05/16449

Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

The abstract is too long (PCT Rule 8.1(b)). The abstract must be less than 150 words, or 200 words when no figure is to be published.

NEW ABSTRACT

A phone synchronization device and method of synchronizing electronic address book data between multiple phone devices is disclosed. In a particular embodiment, the phone synchronization device includes a housing having a support base, a first phone device reception slot, and a second phone device reception slot. The first phone device reception slot includes a first data synchronization port configured to receive and transmit data with respect to a first phone device when the first phone device is disposed within the first phone device reception slot and is in electrical contact with the first data synchronization port. The second phone device reception slot includes a second data synchronization port configured to receive and transmit data with respect to a second phone device when the second phone device is disposed within the second phone device reception slot and is in electrical contact with the second data synchronization port.

Applicant

SBC KNOWLEDGE VENTURE, L.P.

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US05/16449

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US05/16449

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

V. 2. Citations and Explanations:

Claims 1-4, 6 and 7 lack an inventive step under PCT Article 33(3) as being obvious over Huang (US 2002/0115480), in view of Turner (US 6,041,229).

Regarding claim 1 Huang teaches a housing having a support base, a first phone device reception slot, and a second phone device reception slot (see paragraphs (0005) & (0024) and FIG. 10). Huang teaches a first phone device reception slot including a first cellular telephone connector configured to communicate with respect to a first phone device when a first phone device is disposed within the first phone device reception slot and is in electrical contact with the first cellular telephone connector (see paragraphs (0023) & (0024) and FIGS. 9-10, cellular phone connector relates to synchronization port because it makes electrical contact with the phone and enables data transmission). Huang teaches a second phone device reception slot including a second cellular telephone connector configured to communicate with respect to a second phone device when a second phone device is disposed within the second phone device reception slot and is in electrical contact with the second cellular telephone connector (see paragraphs (0023) & (0024) and FIGS. 9-10, cellular phone connector relates to synchronization port because it makes electrical contact with the phone and enables data transmission). Huang does not specifically teach a phone synchronization device, a first data synchronization port configured to receive and transmit data, a second data synchronization port configured to receive and transmit data, and a synchronization data communication bus, the synchronization data communication bus, coupled to the first synchronization port and coupled to the second synchronization port to carry transmission of synchronization data between the first and second synchronization ports. Huang does teach a data transmission cable connected to a plurality of phones (see paragraph (0024), data transmission cable relates to phone synchronization device). Turner teaches a phone synchronization device (see abstract and col. 1, lines 54-60). Turner teaches a first data synchronization port configured to receive and transmit data, a second data synchronization port configured to receive and transmit data (see col. 2, lines 60-66 and Fig. 1). Turner teaches a synchronization data communication bus coupled to the first synchronization port and coupled to the second synchronization port to carry transmission of synchronization data between the first and second synchronization ports (see col. 2, lines 60-66 and col. 4, lines 1-11). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the base in Huang with first and second phone device reception slots adapt to include a phone synchronization device, a first data synchronization port configured to receive and transmit data, a second data synchronization port configured to receive and transmit data, and a synchronization data communication bus, the synchronization data communication bus coupled to the first synchronization port and coupled to the second synchronization port to carry transmission of synchronization data between the first and second synchronization ports because the base in Huang has the connections to transfer data between the phones (see paragraph (0005)) and it would allow for an improved method of transferring information from a first telephone device to a second telephone device.

Regarding claim 2 Huang teaches wherein the first phone device reception slot includes a first phone charging circuit to provide

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US05/16449

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

electrical charge to a battery within the first phone device (see paragraphs (0018) & (0023) and FIG. 9).

Regarding claim 3 Huang teaches wherein the second phone device reception slot includes a second phone charging circuit to provide electrical charge to a battery within the second phone device (see paragraphs (0018) & (0023) and FIG. 9).

Regarding claim 4 Huang teaches wherein the first phone device reception slot is configured to receive a first type of phone device and wherein the second phone device reception slot is configured to receive a second type of phone device (see paragraphs (0023) and FIGS. 8- 9).

Regarding claim 6 Huang teaches wherein the first type of phone device is a wireless phone device and the second type of phone device is a computing device (see paragraphs (0023) & (0026).

Regarding claim 7 Huang teaches wherein the computing device is a personal digital assistant computing device (see paragraph (0026).

Claim 5 lack an inventive step under PCT Article 33(3) as being obvious over Huang, in view of Turner and further in view of Jadoul (US 6,240,297).

Regarding claim 5 Huang and Tuner teach a device as recited in claim 4 except for wherein the first type of phone device is a cellular phone device and the second type of phone device is a cordless phone device. Huang does teach a base adapted to receive a first type of telephone device that is a cellular telephone and as well as additional, different telephones (see paragraph (0005)). Jadoul teaches a docking station adapted to receive a first type of phone device that is a cellular phone device and a second type of phone device that is a cordless phone device (see col. 3, lines 5-7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the device adapt to include wherein the first type of phone device is a cellular phone device and the second type of phone device is a cordless phone device because the base in Haung allows for a plurality of connectors this would allow for a flexible method of transferring information from a first telephone device to a second telephone device.

Claim 12 lack an inventive step under PCT Article 33(3) as being obvious over Huang, In view of Turner and further in view of Link, II (US 2003/0181202).

Regarding claim 12 Huang and Turner teach a device as recited in claim 1 except for wherein the first phone device initiates call forwarding of incoming calls to the second phone device. Link, II teaches phone device able to forward incoming calls (see abstract and paragraph (0051)). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the device adapt to include wherein the first phone device initiates call forwarding of incoming calls to the second phone device because this would allow for an improved telecommunications service that forwards telephone sevice upon detecting a triggering event.

Claims 8-11 and 13-31 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the claimed subject matter.

Claims 1-31 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under Article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the *PCT Applicant's Guide*, a publication of WIPO.

In these Notes, "Article," "Rule" and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions, respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended ?

Under Article 19, only the claims may be amended

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Preliminary Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When ? Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments ?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How ? Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments ?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

1. [Where originally there were 48 claims and after amendment of some claims there are 51]:
"Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
2. [Where originally there were 15 claims and after amendment of all claims there are 11]:
"Claims 1 to 15 replaced by amended claims 1 to 11."
3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
"Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
"Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
4. [Where various kinds of amendments are made]:
"Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under Article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international application is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments and any accompanying statement, under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the time of filing the amendments (and any statement) with the International Bureau, also file with the International Preliminary Examining Authority a copy of such amendments (and of any statement) and, where required, a translation of such amendments for the procedure before that Authority (see Rules 55.3(a) and 62.2, first sentence). For further information, see the Notes to the demand form (PCT/IPEA/401).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see the *PCT Applicant's Guide*, Volume II.
